Wow, that was a long description. It really just started out fast like that, lol. In the area where I posted it - - someone posted a description of how to install it, since I didn't have it in there. I just figured that it might be better to have it in a thread since the forums have much better viewing for these sort of things compared to Facebook. Kangaroo its just a quick and dirty way of getting it to installed, but it did work the way you did it, im sure you could find the mod from here website or torrents or something, but the easiest way was to use that tool, good luck! Ah, I see. That made me a little uncomfortable that the people at PixArK didnt just say in the description what the guide for the tool is without it being in the 3rd post. And the description of mod does nothing but help us to fix the issue we have. Also mind the knife from the description, he could set an explosive or something to blow up the bus... ah well,, i see how its easy and all good. But remember the description is what the tool thats going to be uploaded is. Its here to help, or at least give

What's new in PixARK-Skyward Structure Style Pack:

- A Restoration of Style 4.0 by jack1029 This is a World of Tanks mod that does a lot of styling work for the game. This includes numerous graphical elements and features, such as pixar skylight, furnaces, fireworks, and many other things. This is one of the best (or even THE best) mods at this time, and may change that when the latest pack releases. A whole lot of things have gone into this mod, including some features that make WOT better than it already is. Check out the download at the top of this page. Feel free to send questions/comments/bugs! Size: 45.93MB Description: PIXARK This mod was originally for PGE and it's graphics engine, and from the bottom of my heart wishes that I am able to add pixark to my own WOT mod. Ever since Skies are Rising was released, I have wanted to add pixark style to my own WOT graphics. Due to circumstances, I had to delay the release of the first version of Skies of Rising. I had a way to produce the mod bit by bit, but because of a breakdown of the program, there was a delay in releasing of Skies of Rising. In Skies of Falling, I had the mod uploaded manually, and was able to release it within the required 14 days, which many people are saying is a non-issue, as most people do not have upload servers in game. So when you click the link to download the mod and click on "choose file", you can either select it directly from the folder or if you click on the picture of the mod to get a direct link. The main reason why I released the mod manually was because I had it uploaded, but under an infringing name due to the limiting of PGE graphics in the map. It turns out that I can still add the mod, but cannot release it. Since I was unable to release Skylands of Rising until they approve the mod for WOT, and I am slightly curious if they will as this is not one of their mods and my opinion, I had started thinking about the Skylands mod. I thought to myself "When is Skylands of Rising being released?", and I came to the conclusion that at some point I would have to release the mod. That time came a few weeks back, the Skylands Update. It was
